# Suites

The shape of your suite sets the style for the rest of your bathroom, so it’s important to consider what look and feel you want overall when choosing. We have sizes to suit large bathrooms or small cloakrooms and a range of shapes that reflect the most popular current styles.

Rimless toilets are super easy to clean as they flush by propelling highly efficient jets of water around the bowl. Wall hung toilets also aid cleaning and by exposing the floor your bathroom looks bigger. Comfort height toilets are set at around 450mm; ideal for taller people or the elderly. Short projection pans don’t project into the room as far and so are perfect for smaller spaces.

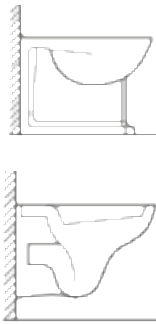

**Close Coupled WC – fully shrouded or open back**

A close coupled WC has the cistern resting directly on top of the pan towards the rear.

With fully shrouded, the toilet sits flush against the wall with the waste pipe and water inlet hidden.

Open back toilets have access at the back for your pipework, perfect if you are planning to box in the pipes from left or right.

**Back to Wall WC**

The concealed cistern is hidden behind a wall or fitted furniture.

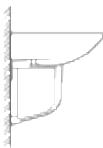

**Wall Hung WC**

The pan is held off the ground by a hidden supporting frame and the cistern is hidden.

**Full Pedestal**

The most popular choice, a full pedestal hides all the pipework whilst supporting the basin.

**Semi Pedestal**

Increasingly popular, a semi pedestal sits under the basin and hangs from the wall, freeing up floor space below.

**Semi Recessed**

Designed to be mounted into a work surface, the front of the basin protrudes forward

# Shower baths & bath screens

Shower baths are the most popular option – the best of both worlds. There are many possible looks available. Introduce soft curves, angular lines, or create a feature with a brassware co-ordinated screen. In practical terms, consider a hinged or folding bath screen for opening the space.

# Shower trays & enclosures

Perhaps you prefer a wet room to a traditional bath configuration? Shower enclosures are often an integral part of defining your overall bathroom style.

Speak to our design specialists about fluted glass, sliding or hinged doors, curved quadrant shapes and ask about the latest in shower tray anti-slip technology with super slim profiling.

# Showers

Choose a mixer shower that connects to the hot and cold water supplies and then mixes the water inside the shower to your selected temperature. Mixer showers normally deliver a higher flow rate than electric showers and are often thermostatic to protect against scalding. You can also add a pump if required to boost the flow from a gravity fed system.

Alternatively, electric showers connect to the cold water main supply. A heating element inside the unit heats up the water as it passes through. It doesn't rely on stored water and provides instant hot water on demand.

# Brassware

The highlight of any bathroom, brassware needs to blend in with your design style, so choosing the right finish is key. Chrome is the traditional preference, although brushed brass and bronze, or even matt black are options which may just complete your look.

# LAUFEN

Creating innovative bathrooms with great designers and Swiss dedication to quality is the essence of Laufen.

Perfectly reflecting Swiss roots and values of clear and precise design, superior quality and extreme durability.

Collections which have redefined the boundaries of bathroom design. A result of engineering skills in constant collaboration with the world's leading designers.

# Introducing Laufen

## Intensive cooperation

Laufen’s original bathroom concepts are created together with famous designers and architects – their creativity and vision open up new design dimensions for the brand.

## A revolution in ceramic material

SaphirKeramik is the globally significant innovation, patented by Laufen. This revolutionary ceramic material reaches exceptional hardness, blended with corundum which is a colourless mineral - a component within sapphire stones. SaphirKeramik has a flexural strength equal to that of steel, yet it has the potential to be wafer-thin, giving designers almost infinite freedom to experiment – and tear up the rulebook of bathroom design.

Simultaneously hard and malleable, SaphirKeramik enables pieces to be made with very thin, yet very strong walls of only 3–5mm, as well as with narrowly defined radii of only 1–2mm. The slim profile of SaphirKeramik means that it saves space, is light and environmentally friendly.

## Circular process innovations

Products designed to be as climate-friendly, environmentally friendly and socially responsible as possible – from the selection of materials and production to delivery, use and recycling.

Laufen aims to achieve net zero emissions by 2045, primarily through measures to increase energy efficiency, the expansion of renewable energies, the acceleration of digitalisation and the compensation of its own CO<sub>2</sub> emissions.

In 2023, Laufen began operating the first electric tunnel kiln for sanitaryware, producing complex ceramic pieces in Gmunden. The plant already uses electricity from renewable sources.

# Ilbagnoalessi

Designed by Stefano Giovannoni

Italian architect and designer Stefano Giovannoni breaks out from the repetition of form and room geometry. Ilbagnoalessi leaves worn stereotypes behind and discovers newly conceived contours and subtle irregular shapes.

The long organic form of the iconic Tuna basin is available as a bowl or countertop version. Other highlights include a freestanding bath made of Sentec, a mineral composite with a velvety texture and an egg-shaped wall hung toilet. The basins, WC and bath are available in matt white, matt black and matt coffee.

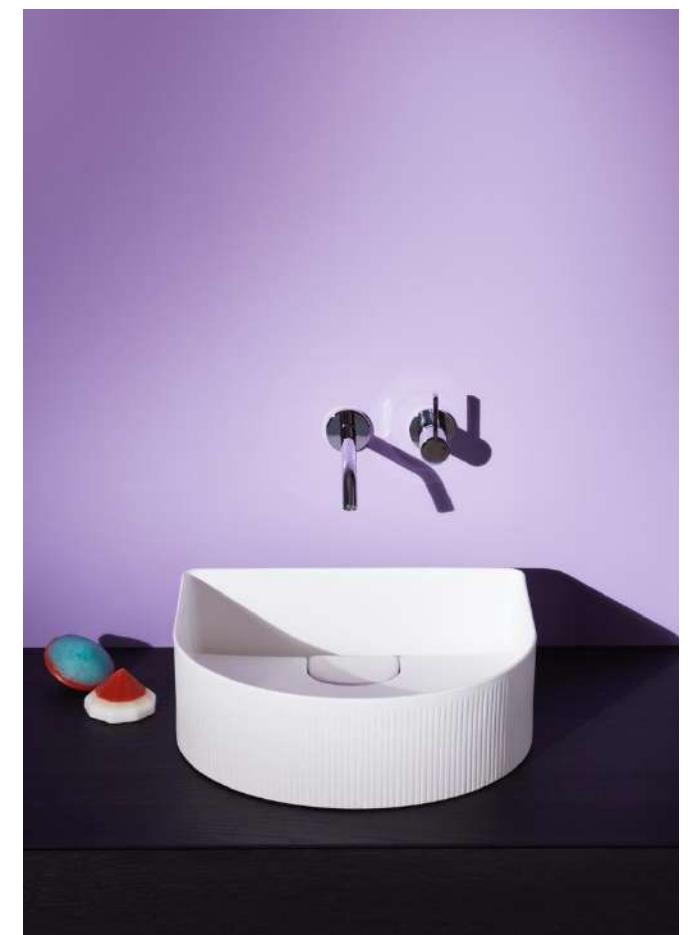

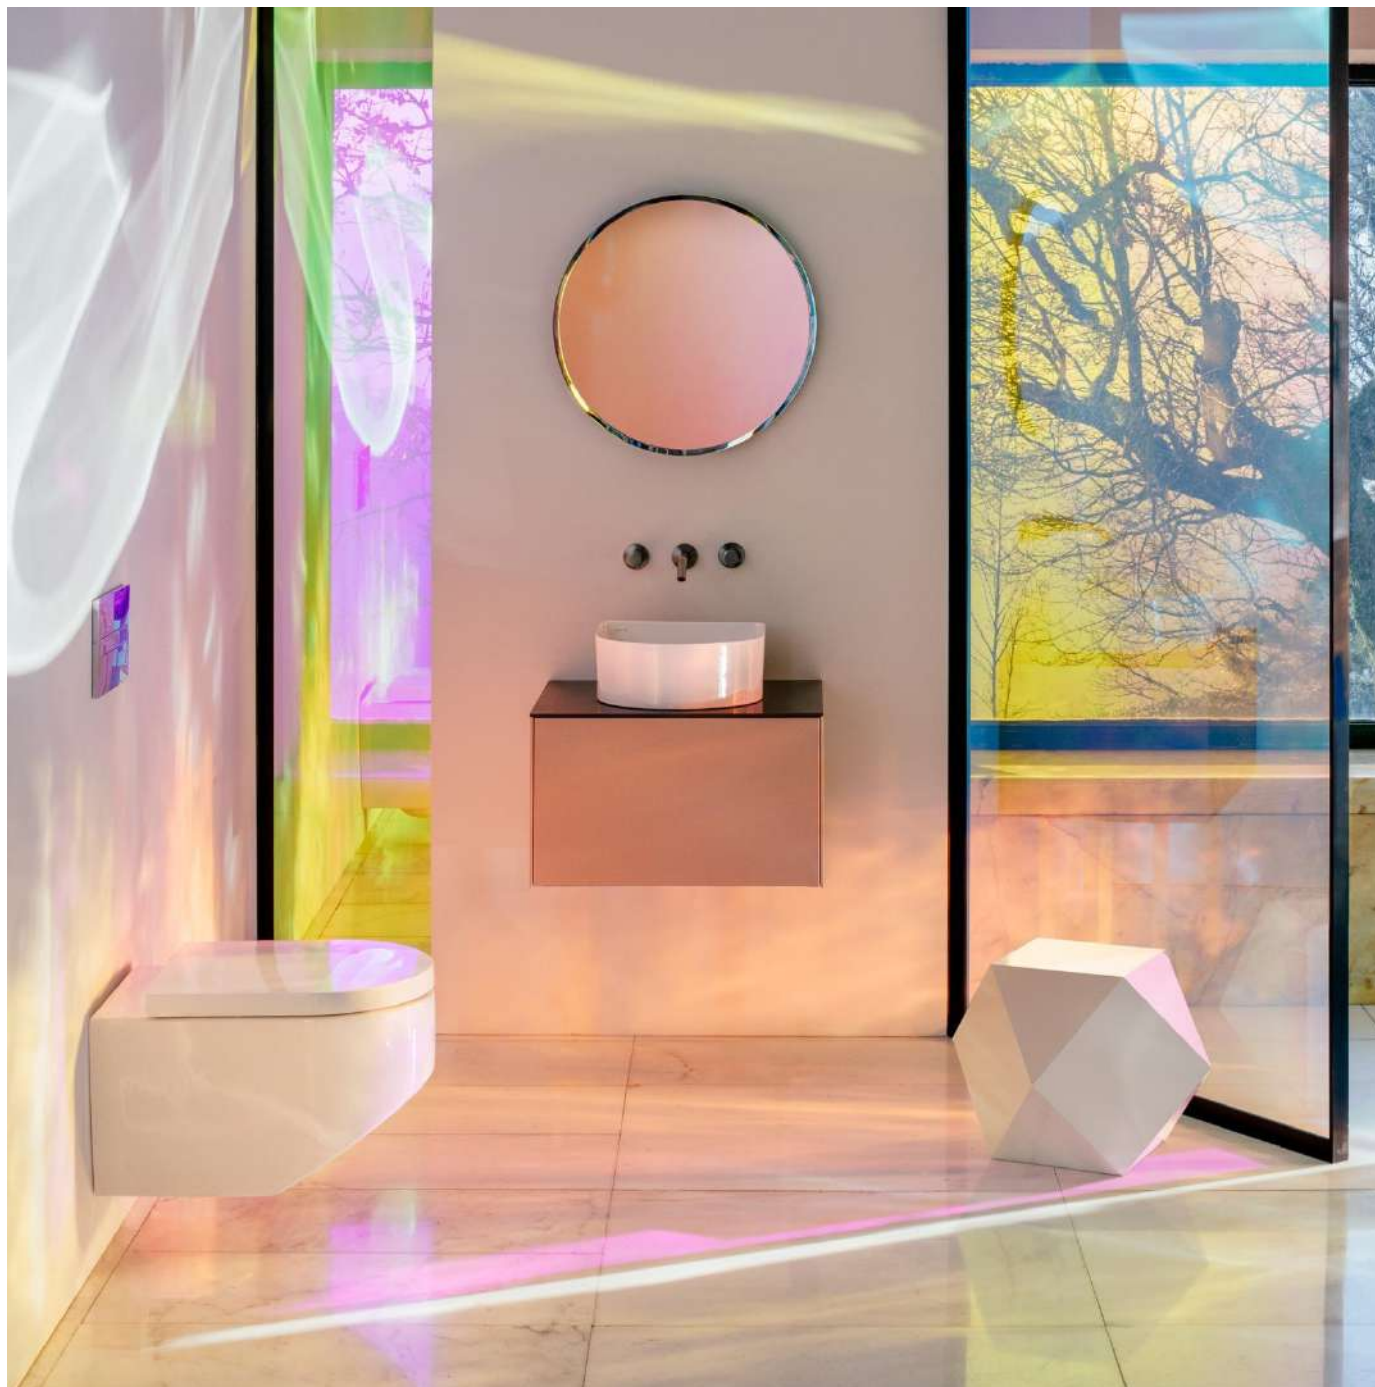

# Sonar

Designed by Patricia Urquiola

Patricia Urquiola exploits the fineness of Laufen's SaphirKeramik. Accentuated geometry and sensual textures. The basin and freestanding bath feature an ultra-thin gently rippled exterior that mimics the way sound waves travel through water. This optional feature complements the traditional smooth surfaces in the collection, which has expressive, yet minimalist formal language.

"I not only wanted to work with the lightness of the ceramics, I also wanted to find a way to design its surface." said Urquiola. "I liked the idea of using the little waves generated by sound."

# The New Classic

Designed by Marcel Wanders

Wanders contrasts romantic flourishes like tulip-shaped ceramic pieces with rims that curve gently outwards and sloping, walnut wood legs with modern lines. Harmonious shapes set against a monochrome blackened oak or slate grey colour palette.

“What we have sculpted in this collection is a poetic experience.” says Wanders. “The bathroom is a place reserved for relaxation, rejuvenation and true piece.”

# Val

Designed by Konstantin Grcic

The Val collection consists of flexible and dynamic designs that rethink the proportions of bathrooms. Grcic's aim was to make the best use of the restricted space in compact, demanding bathroom layouts, without making them feel cluttered.

"When pieces are installed in a bathroom, one must not look at them in an isolated way, but rather observe them as part of a complex environment. The simpler they are, the better they appear." said Grcic.

Clear geometric lines, extremely narrow edges and finely textured surfaces unite in harmony. Integrated functions include semi-dry basin shelves, which can be used to store soap, cosmetic or shaving brushes.

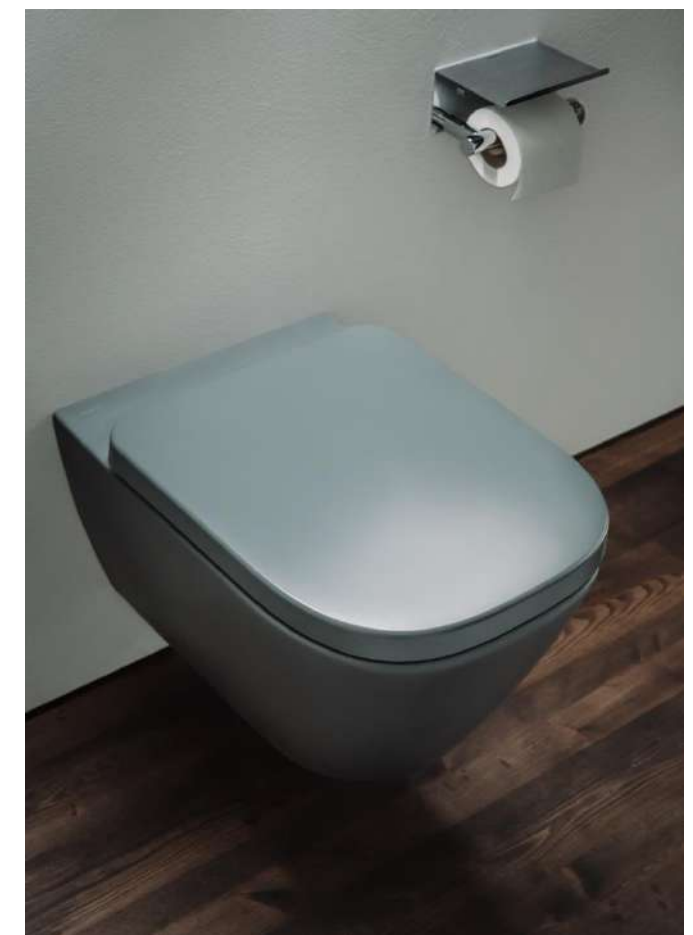

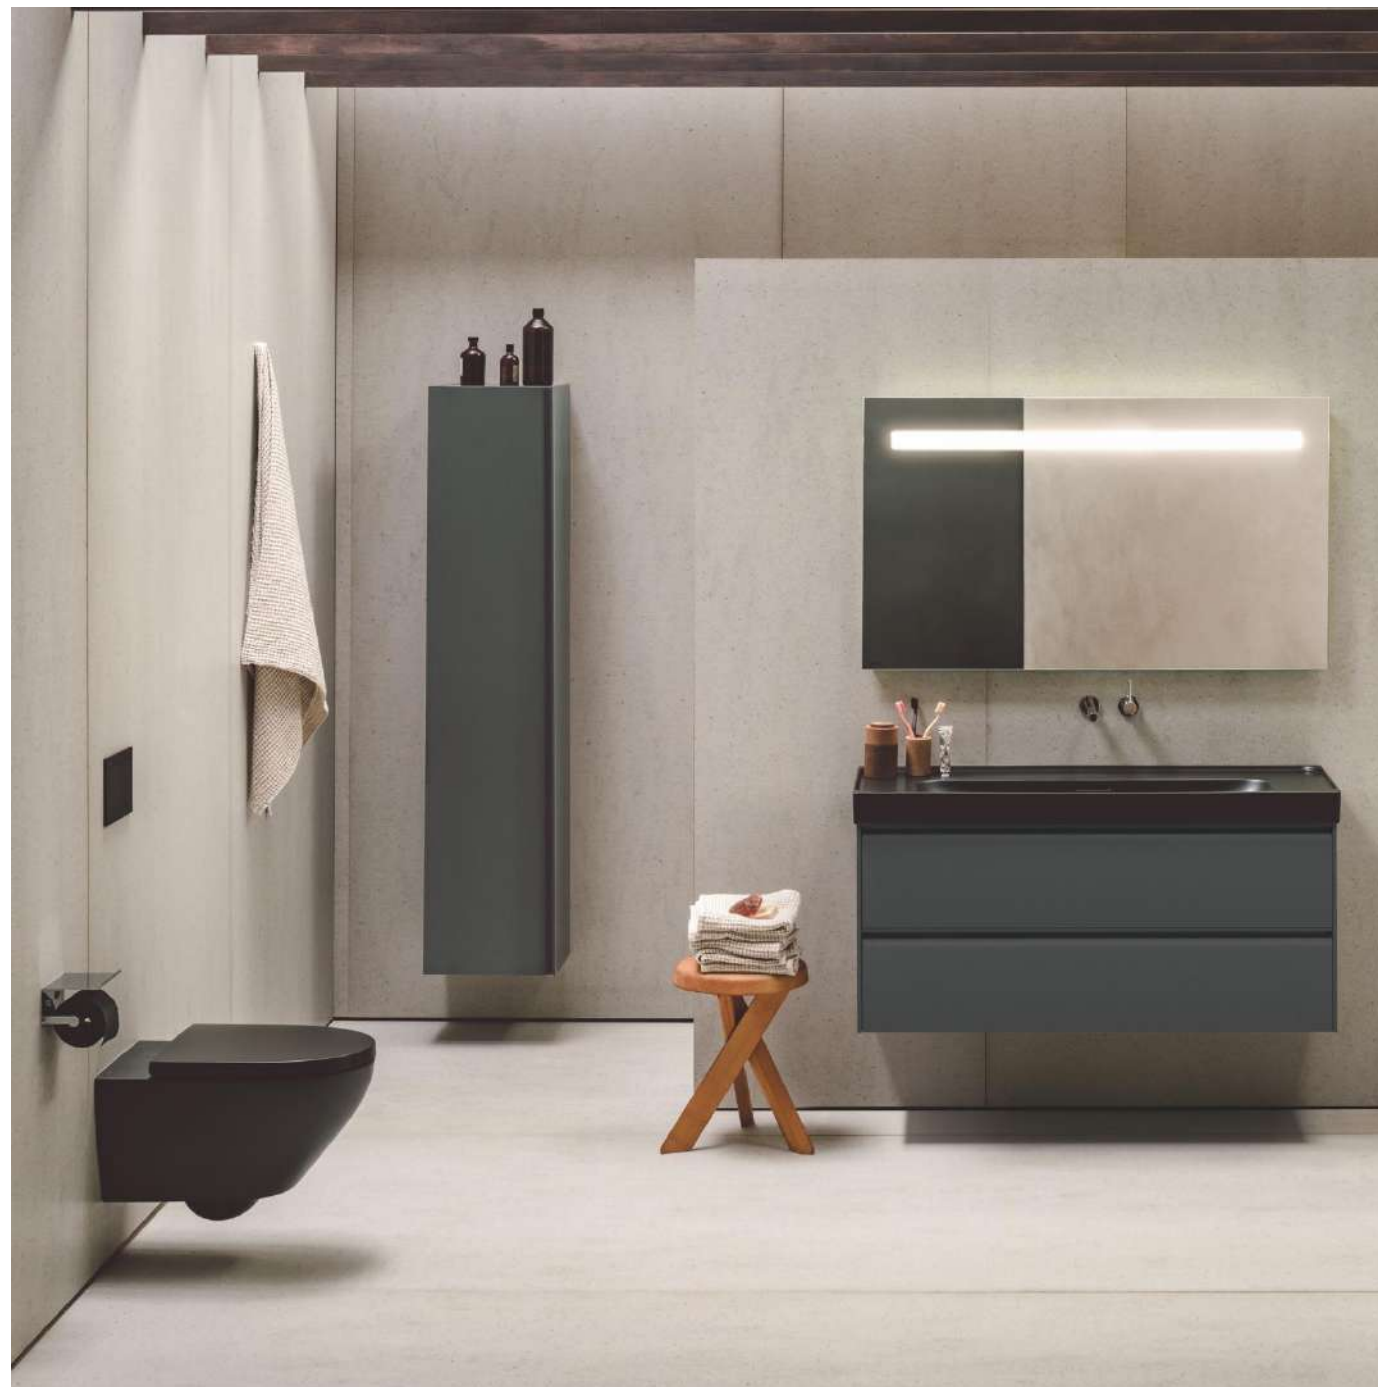

# Meda

Designed by Peter Wirz

Meda: "Made for life", the all-in bathroom collection. The vanity units feature a clear, linear design with slim side walls echoing the elegant geometry of the washbasins. Tactile aluminium handles complement the furniture which is available in 43 colour options.

Create a visual highlight with the thin-walled, two-tone bath. A sleek matt traffic grey or matt black exterior harmonises flawlessly with the ceramic and furniture of the same hue, while the interior provides a stunning contrast in glossy white.

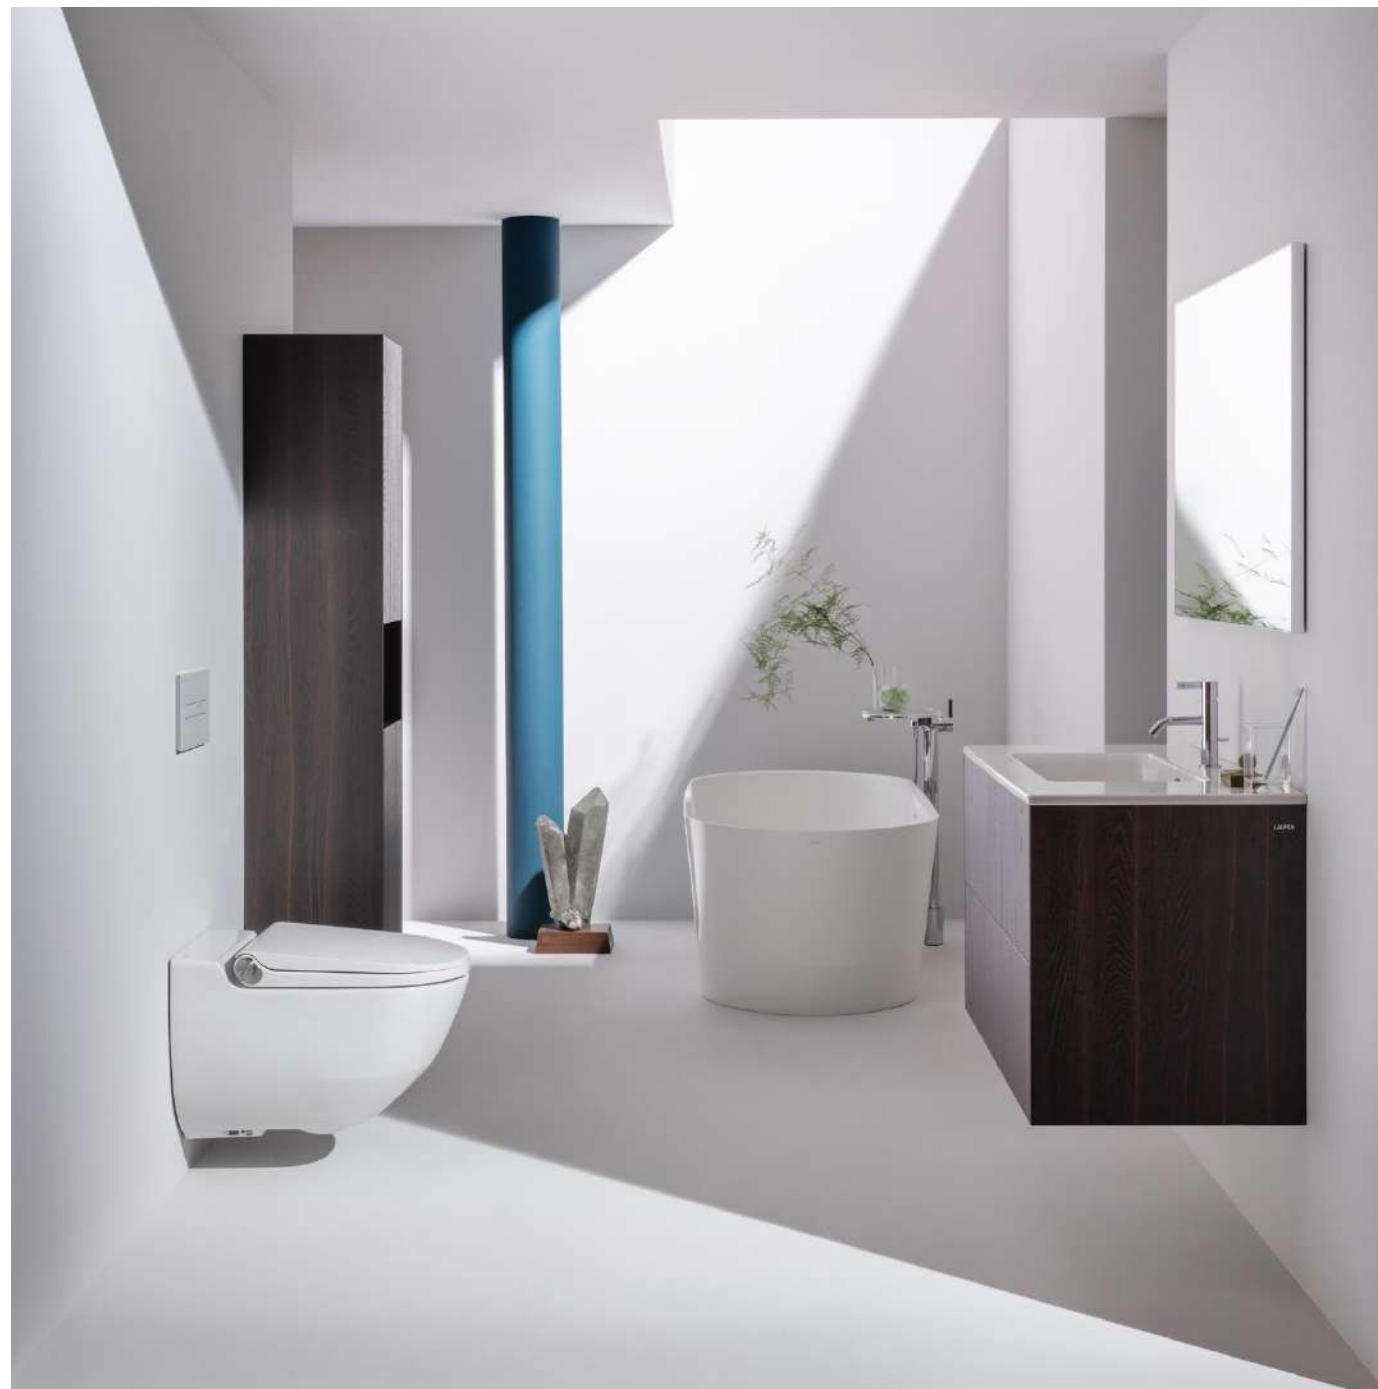

# Pro S

Designed by Peter Wirz

With lots of sensitivity Peter Wirz brought about a systematic, production-optimised evolution of the Pro concept: Thanks to its slim silhouette and clearly-defined radii, the washbasin has a light and elegant, appearance. The deep bowl means that it's also functionally appealing. The aesthetics of Laufen Pro S therefore definitely take the range in the direction of Laufen's premium design lines – while remaining affordable by all.

# Pro

Designed by Peter Wirz

Pro's industrial design is the modern answer to the once revolutionary idea that everyone has a right to enjoy beautiful forms.

# Lua

Designed by Toan Nguyen

Clear, geometric lines united in one continuous form. Lua draws its inspiration from daily life and the universal theme of water. A clear, stylistic vocabulary of rectangles and curves. Straight lines, gently rounded corners and edge radii create a pleasing symbiosis with the oval ceramics.

# Lani

Designed by Toan Nguyen

With its slender and timeless design, the Lani furniture series, which is as practical as it is aesthetic, harmonises perfectly with Lua. It can also be making well thought-out storage solutions possible for both new and existing bathroom concepts with tried-and-tested washbasin objects. The all-rounder Lani inspires not only with its formal quality - Functional refinements are also built in, creating bathroom furniture that is more than the sum of its components.

# Base

## Furniture & mirror cabinets

Time spent in the bathroom is balm for your soul. With Base, this experience could not be more pleasant. The newest range of bathroom furniture sets the scene, complementing the Laufen ceramics collection, to create an aesthetically pleasing experience. With technology suitable for everyday use, a variety of surfaces and a wide range of colours, the range supports even the most ambitious bathroom planning without compromise.

# Shower accessories

The rain shower heads made of high quality stainless steel are supplemented by versatile hand shower heads in various formats. Matching shower accessories are perfectly harmonised with the various shower heads. From the convenient wall support to the carefully designed shower slide bar with sophisticated side-mounted controls, it provides the best possible solution for all needs.

# GUILD

COLLECTION

The Guild Collection by Burlington takes inspiration from the Arts and Crafts design movement of the late 19<sup>th</sup> Century.

Reacting to the effects of industrialisation and machine-dominated production, this era marked the beginning of a change in the value society placed on how things were made. Products were developed with more integrity, focused on craftsmanship rather than previously ornate designs.

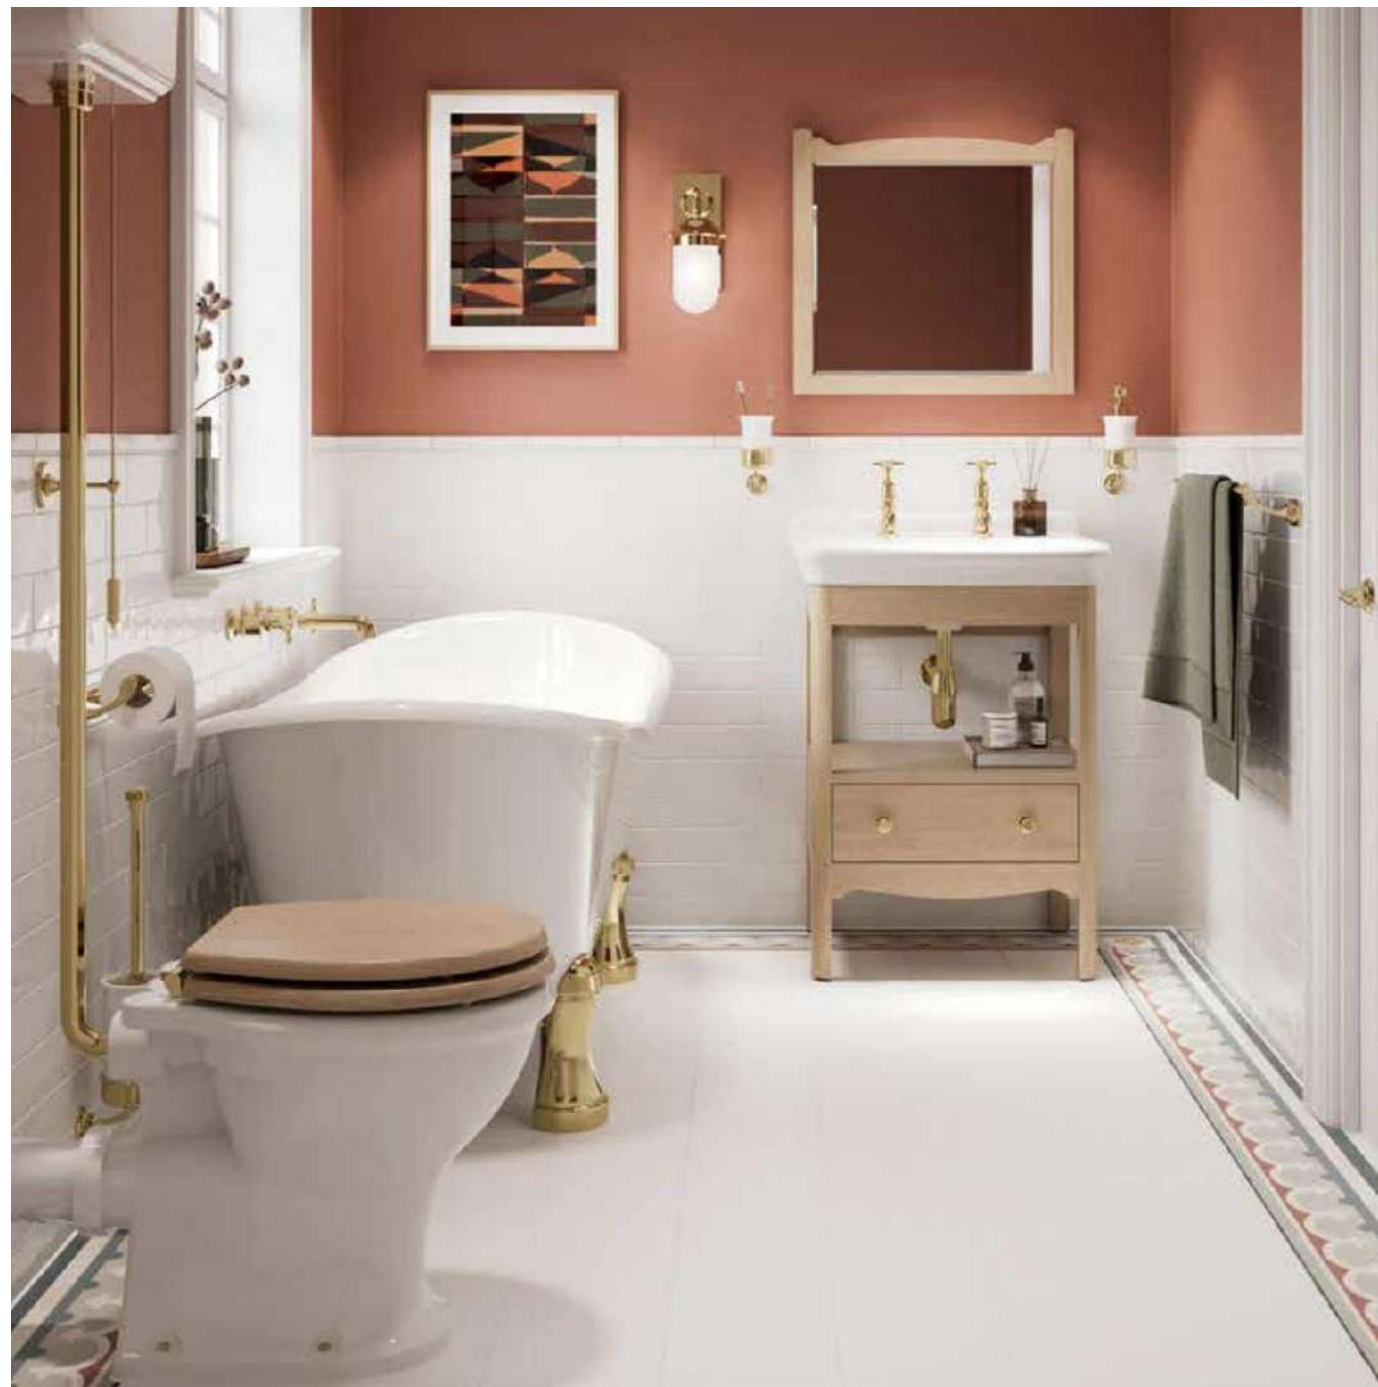

*Burlington*<sup>®</sup>

# Guild furniture

Featuring clean geometric lines, the Guild furniture unit takes inspiration from this design era by rejecting excessive ornamentation while still providing a subtle decorative finish.

Available in three sizes and five finishes with a soft close drawer and shelving space, this unit provides plenty of storage and is available with either a wash basin or a worktop designed for a countertop basin. Matching mirrors available.

# Guild ceramics

A defining feature of Arts and Crafts design is a focus on skilfully made products that last a lifetime, with careful attention to the materials used. Guild’s ceramic range featuring a selection of basins and toilets, is a perfect example of this ideology. Made with the highest quality ceramic materials, the Guild ceramic range is built to stand the test of time.

In four sizes, the Guild basin is designed for cloakrooms and large family bathrooms alike. A choice of set-ups including wall hung, pedestal or washstand. The minimal and elegant Guild toilets are designed to harmoniously blend into any traditional bathroom design. There are four sizes, including concealed cistern and high-level design. The soft close seat is available in the same finishes as the furniture units.

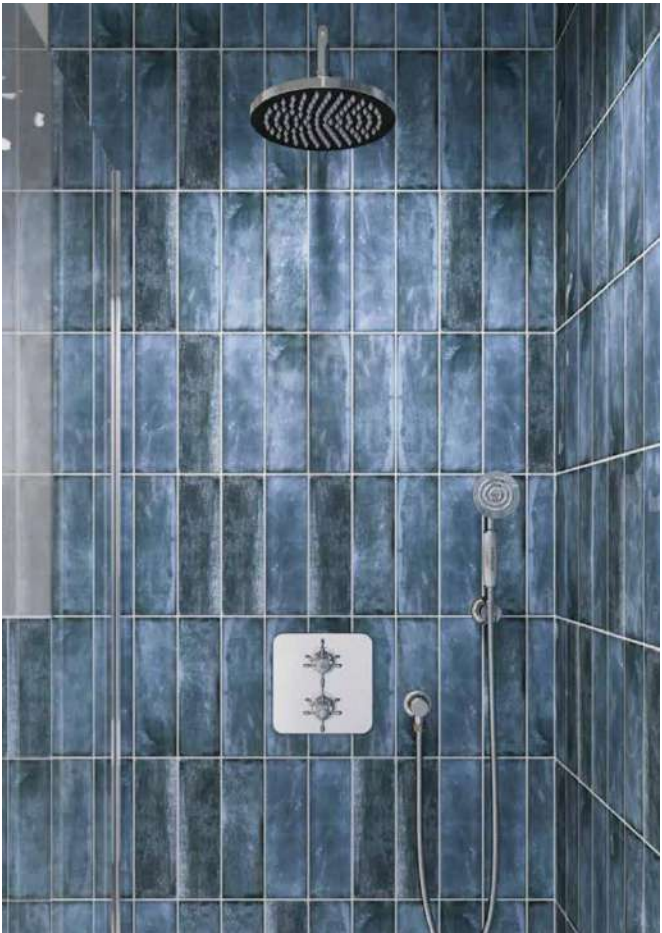

# Guild brassware

A beautifully traditional design with modern interpretation. Wall and deck mounted options and various tap hole layouts for both basin and bath. Available in chrome, gold and brushed nickel.

# Guild mirrors & accessories

The Arts and Crafts movement sought the return to a simpler, more fulfilling way of life. Conveying this philosophy is the Guild accessories range. Providing accessories for the whole bathroom, the subtle, beautiful design focuses on easy everyday use. Minimalist and sophisticated by design, in chrome, gold and brushed nickel.

Two mirror sizes are available and a mirrored cabinet. Accessorise with frosted or clear wall lights, soap dispensers, towel rings, soap dispensers, toilet brush and tumbler holders.
